Charcuterie

HAMy Charcuterie

Searching Partners for Franchise "HAMy" "French Auvergne Charcuterie"

[HOME](#)
[WE SEARCH](#)
[HAMY SHOP](#)
[FRANCHISING](#)
[CONTACT](#)

Franchising HAMy

Pork is the basis of the diet in the Philippines, yet apart from rough cutting due to a total lack of training, there are few cured pork products. The "HAMy" Franchise aims to create a network of charcutiers who self-produce their own realizations but integrate Auvergne ham and sausage products for resale.

Charcuterie is a product made from pork meat or offal. The word also designates the store where this type of product is sold and all the professionals who sell it.

Butcher.

Charcutier.

Head of charcuterie laboratory.

PIZZA ITALIA

46 years of our hand 100 years of tradition. The spirit is present in every dish. Bonjour Bistrot is taking away from the past and the future.

Bonjour Cafe!

At Bonjour Bistrot we do not serve coffee without accompanying it with a croissant. The coffee is made by our own roasting machine and the croissant is made by our own bakers.

Bonjour Bistrot!

The Bonjour Bistrot offers you a pleasant setting to take the time to enjoy the dishes prepared by our chef. The menu includes classic French dishes.

Bonjour Bakery!

Baking is a French tradition based on love. The bakers and the croissants are made with the finest flour in the world.

Solinjection

A building and/or paving settles when its base is made of particularly compressible materials. It could be a soil with insufficient initial bearing capacity such as embankments. It can also be an accidental weakened ground, for example following a water leak in the ground or an accidental decompression after uncontrolled earthmoving nearby. The settlement of the ground causes that of the construction above. SOLINJECTION® techniques allow the consolidation of these soils with insufficient bearing capacity

The Brocciu. The Corsicans call it casgiu naziunale, "national cheese". You will love the delicacy of this cheese, made from sheep's or goat's milk. The only AOC and AOP cheese on the Isle of Beauty, it provides numerous health benefits since it is rich in iodine, vitamins, calcium and amino acids.

The Calinzana. It is a soft cheese produced in Calenzana in Balagne. Extremely difficult to make, its powerful and spicy taste requires special know-how.

And so many others

BIOTEOS : OXYLON

We decided to combine Nature & Technology to design OXYLON: a functional urban furniture improving the air quality of interior spaces welcoming the public as well as 30 trees would. How? 'Or' What ? Thanks to the great properties of microalgae.

Concerned about current environmental and health issues, Bioteos aims to combine nature and technology in the service of humanity. We have developed OXYLON, a carbon sink based on the immense potential of microalgae in order to purify the air. Our modules have been specially designed for interior spaces that constantly welcome people, such as the metro, schools, offices, etc. The icing on the cake is that we're transforming air pollution into energy that can be used via methanation.
